**USING YOUR CABLE**

1 Check if your source device (such as a digital camera or camcorder) uses a mini HDMI or micro HDMI connection.

a. If it uses mini HDMI:

Connect the cable to your source device, then to your display (such as a TV or monitor).

b. If it uses micro HDMI: Connect the adapter to the mini HDMI connector on the cable, then connect the cable to your source device and your display (such as a TV or monitor).

- 2 Turn on your display, then select the HDMI input that you connected the HDMI cable to.
- 3 Use your source device to control output/playback.

Note: Use your display (output device) to adjust the volume. For more information, see the instructions that came with your source device.
